[1204 N Allen Pl, Seattle, WA 98103, USA](#)

## Hydro Jetting

Techs ran hydrojetter through 4 inch pvc cleanout on the outside of the home. Techs ran jetter to the city main clearing line of root intrusions in the clay pipe. Techs also ran camera to ensure the roots were fully removed from the line. After clearing all the roots as much as possible techs ran camera to the city main and made a video recording of the line. Line is open and draining at this time. No guarantees on any future issues.

When running camera techs noticed a root growing into the back side of the 6 inch connection coming from the neighbors home. Techs cleared the root as much as possible to prevent it from catching debris from 1204. At this time techs recommend letting neighbor know about root and to have them get root removed from their line as well.

Thank you.

Tristen and Frank
